Dublin, Ireland | +353 89 968 9481 | menonrohith1294@gmail.com | linkedin.com/in/rohithmenon-637358102

Right to work in Ireland: Stamp 4 | Notice period: 2 months

PROFESSIONAL PROFILE

ML/AI Engineer with production experience delivering machine learning and agentic AI systems on AWS. Hands-on experience building agent orchestration platforms, automated ML pipelines, and model evaluation/governance frameworks (regression, ranking, and top-K metrics) as part of a small, high-ownership engineering team. Strong foundation in cloud-native, serverless architecture and enterprise data pipelines, backed by AWS Certified Machine Learning – Specialty and AWS Certified Solutions Architect – Associate credentials.

KEY SKILLS & TECHNICAL EXPERTISE

- Python for data engineering and agentic AI systems (production ML/AI experience)
- Agentic AI: Strands Agents framework, agent design patterns, agents-as-tools orchestration
- AWS: Bedrock, AgentCore, SageMaker, Lambda, Step Functions, serverless architecture
- Automated training, evaluation & conditional deployment pipelines (MLOps)
- Model evaluation & governance: regression, ranking, top-K metrics; lineage via Glue/Athena
- ML modelling: recommendation systems (collaborative & content-based filtering)
- Strong communicator, comfortable presenting technical solutions to varied audiences

PROFESSIONAL EXPERIENCE

Senior Machine Learning Engineer — Creditsafe, Dublin

Oct 2022 – Present

- Architecting and building an agentic AI platform on AWS Bedrock AgentCore, designing multi-agent systems with the Strands Agents framework's agents-as-tools pattern.
- Built and deployed a company Q&A agent that grounds LLM responses in live company data, persisting session state to S3 for conversational continuity across requests.
- Engineered end-to-end MLOps automation with AWS Step Functions, orchestrating SageMaker training, evaluation, and conditional deployment gated on RMSE and ranking-metric thresholds.
- Built and maintained a company recommendation service, deploying content-based and collaborative-filtering models to SageMaker inference endpoints across multiple countries.
- Designed a model evaluation and metadata framework (regression, ranking, and top-K metrics) catalogued via AWS Glue/Athena, enabling automated deployment gates and full model lineage/governance.
- Integrated AWS Bedrock Guardrails across AI services to ensure outputs met internal security and responsible-AI standards.
- Delivered scalable Python data pipelines for data cleansing, annotation, and analysis supporting backend ML applications; led feasibility studies evaluating technical and operational trade-offs.

Data Science Intern — Orcawise, Dublin

Jan 2022 – Mar 2022

- Applied data science techniques to clean, transform, and analyse business datasets as part of an academic-industry placement, supporting exploratory analysis and reporting.

Consultant — Intellect Design Arena Ltd, Mumbai

Jan 2021 – Aug 2021

- Integrated data APIs (Apollo Client, GraphQL) between an Angular front end and backend services for banking transaction applications, ensuring compliance with design and requirement specifications.
- Built reusable technical modules that cut development time for new banking application components by ~25% through shared codebase and code-analysis practices.
- Collaborated within a 10-person cross-functional team (developers, business analysts, backend engineers) across the full product lifecycle — sprint planning, reviews, and UAT.

Associate Developer — BTS Group AB, Mumbai

2018 – 2020

- Automated simulation-creation workflows using Python integrated with internal APIs, reducing manual effort in generating business-strategy simulation products.
- Built 20+ Power BI dashboards and reports for data analytics; performed data cleansing, mapping, and integration from SQL Server, Excel, and flat-file sources into web applications via microservice APIs.
- Developed and deployed Angular/HTML5 single-page application features, digitising financial models from Excel into interactive web tools.

EDUCATION

MSc in Computing, Data Analytics (Grade 1.1) — Dublin City University, Ireland (2021–2022)

Post Graduate Diploma in Advanced Computing (Grade 2.1) — C-DAC (2017–2018)

Bachelor of Engineering, Electronics & Telecommunication (Grade 1.1) — University of Mumbai (2012–2016)

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty
- AWS Certified Solutions Architect – Associate
